Summary

Senior Software Engineer with 6+ years of experience in Front-end development with a strong focus on **React**, **TypeScript**, **Node.js**, and scalable backend architecture. Proven ability to build and integrate modular, reusable UI components with performant APIs, particularly for media, data, and workflow platforms. Skilled in **component-based architecture**, **state management**, and **maintainable code design**. Strong team collaborator, practiced in Agile environments, and passionate about delivering high-quality digital experiences in fast-paced industries including **higher education** and **e-commerce**.

Certifications

- AWS Certified Developer – Associate [Link](#) April 2023

Experience

Web and Application Developer II 2023- Current

[University of Central Florida](#)

- Lead frontend development for corporate-facing apps using React, TypeScript, and Vite, enhancing load times and maintainability.
- Developed and maintained responsive, accessible, and SEO-friendly templates for key university platforms.
- Collaborated with design, marketing, and product teams to implement new pages, revise content, and maintain brand consistency.
- Integrated Google Analytics 4 and Tag Manager for event tracking and data-driven marketing reports.
- Managed Git-based version control, CI/CD workflows via GitHub Actions, and production deployments.
- Ensured site stability, accessibility compliance, and data security in alignment with institutional standards.

Full stack Developer 2021- 2023

Touro University, New York, NY

- Built and maintained SPA dashboards with Vue.js and React, integrating RESTful services via PHP and Python.
- Led dashboard creation using custom REST APIs and server-side logic (PHP/Python).
- Participated in Agile sprint planning, code reviews, and stakeholder meetings for iterative improvements.
- Implemented RESTful APIs and SQL queries for custom financial and academic workflows.
- Integrated Google Tag Manager for detailed analytics reporting and optimization.

Frontend Developer 2020- 2021

[Digi Style](#)

- Designed UI components using React and TypeScript; implemented A/B tests to optimize usability.
- Worked with designers to deliver accessible, SEO-friendly layouts with HTML5/CSS3.
- Conducted performance testing and ensured responsive behavior across devices.

Web Developer 2018-2020

Mahira Gallery, jewelry online store.

- Designed responsive e-commerce platforms using HTML, JavaScript, and jQuery.
- Integrated frontends with RESTful services and optimized mobile experiences.
- Conducted manual QA testing and collaborated with designers on iterative improvements.

Skills

Frontend Development

Frameworks & Libraries: ReactJS, Redux, Vite, SCSS, Material UI, Angular, TypeScript, JavaScript, jQuery

Styling: HTML, CSS, SCSS, Bootstrap, Material UI

Tools & Techniques: Responsive design, WCAG accessibility standards, SEO optimization, A/B testing, cross-browser testing

Backend Development

Frameworks: Django, Node.js, PHP

Databases: MySQL, SQL

API Development: REST APIs, JSON, XML

Content Management & Usability

Platforms: WordPress (custom themes, plugins), Adobe Creative Suite (Photoshop, Illustrator, XD), Figma

Usability & Optimization: Performance tuning, cross-browser compatibility, user experience design (UX/UI)

Cloud & DevOps

Platforms: AWS (EC2, S3, Lambda, CloudFront, API Gateway, VPC)

Tools: Jenkins (CI/CD), Git, GitHub Actions, Cron jobs, Agile methodologies

Analytics & Tracking

Google Analytics 4 (GA4), event tracking, and data-driven decision-making

Education

• **Master of Computer Science & Information Systems GPA 3.8**

Touro University

MAY 2023

New York, NY

• **Bachelor of Interior Architecture, GPA 3.43 (3.66 in last year of study)**

Soore University

2012

Tehran, Iran
